Outline

- *What is DMC?*
- *How can DMC support the Standard Procurement System (SPS)?*
- *Who is using DMC?*
- *Points of Contact*

What is DMC?

- *The Defense Information Systems Agency operates 16 computing centers (Defense Mega Centers) within the continental United States.*
- *The centers provide a wide range of services including applications support, network management, electronic vaulting, and continuity of operations.*
- *The centers support all branches of the Department of Defense.*
- *Standard Procurement System (SPS) support is currently provided by the DMC in Columbus, Ohio.*

How can DMC support SPS?

- *DMC can provide sites with remote server access, thereby reducing the hardware infrastructure requirements of the individual sites*
- *DMC provides general database administration support including daily backups*
- *DMC can provide some database update support, including large clause updates*
- *DMC can support the transmission of data to a shared data warehouse (SDW) and can host the SDW*
- *Note: Beginning in FY 1999, use of DMC by SPS sites will be on a fee-for-service basis*

Who is using DMC?

- *Currently there are 17 DoD SPS sites utilizing the DMC in Columbus, Ohio*
- *Of those 17 sites, 5 are Department of the Navy sites*
 - *Marine Corps Combat Development Command, Quantico, Virginia*
 - *Marine Corps Logistics Base, Barstow, California*
 - *Marine Corps Recruit Depot, San Diego, California*
 - *US Naval Academy, Annapolis, Maryland*
 - *US Naval Observatory, Washington, D.C.*
